Test case for facebook

Test Cases

Successfully added the new test case. Add another

Type	Priority	Estimate	References
Functional	High	10 minutes	R2
Automation Type			
None			

Preconditions

1. Facebook's login page ought to appear

1. Messages should be able to be sent by users.

2. The user can distribute the narrative

4. The Logout Page should appear

Steps

1

In the field, enter a working phone number or email address.  
Enter a secure password in the box.  
Select "Login" from the menu.  
Visit the Profile tab (is displayed in the left panel, for example).  
In the right side panel, select the Chat tab.  
Choose the desired friends from the display.  
Type any message (Eg. Hi)  
Hit the Enter key.  
Visit the homepage.  
Under the search box, select the Create story tab  
Check out the home page.  
Choose the Create story option from the search box.  
Select the tab for a picture or text story. (Text narrative, for instance.)  
To enter any text, use the type box.  
You can select any background colour that shows up on the screen.  
"Share To Story" can be chosen from the menu.

Successful entry of the phone number or email address was made.  
Having entered a strong password, the field has been successfully filled out.  
The login form is successfully opened on the same page.  
The Profile tab appears on the screen as intended.  
The Chat tab successfully opened.  
The friends tab is successfully visible on the page.  
The selected chat box was successfully opened.  
The selected recipient receives the message that was entered without any problems.  
The previous Home page opened successfully.  
The story tab successfully loads.  
The text tale tab was successfully opened.  
The text has been successfully typed into the keyboard.  
Effectively, the backdrop colour tab has been selected.  
The Story is presented clearly.
